JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

NOTES

In the splendid volumes dedicated to Sir William Osler in honor of his seventieth birthday are some contributions of especial interest to parasitologists. Among these may be noted the papers on malaria control by Bass, on preliminary streptothricosis by Bridge, on spirochaetal jaundice by Gwyn, on leukocytes and protozoa by Goodrich, and on the significance of *Rickettsia* by Strong.

Professor Frank G. Haughwout, who for the past five years has been Professor of Protozoölogy and Chief of the Department of Parasitology of the College of Medicine and Surgery, and in the Graduate School of Tropical Medicine and Public Health, University of the Philippines, has transferred to the Bureau of Science, Manila. In the latter institution Professor Haughwout will be protozoölogist and will have supervision over the work in parasitology which it is planned to conduct on an extensive scale. Professor Haughwout will retain the position of professorial lecturer in protozoölogy in the University.
